

First Announcement and Call for papers

**Seminar on
Tree Biotechnology 2013
(Emerging opportunities and Future perspectives)
23-24 September 2013
Institute of Forest Genetics and Tree Breeding
Coimbatore, Tamil Nadu India**

The goal of this two day seminar is to provide an interactive platform to researchers from academia, industries, forest departments and students to share and exchange their research experiences in Forest Biotechnology. It will also provide a learning experience to all participants on the applications of cutting edge technologies in tree biotechnology. We encourage you to share your knowledge by submitting contributions to the seminar.

The seminar covers broad area under forest biotechnology focusing on both academic research and application. Participants may submit contributions (Oral & Poster) in the following categories:

- + Advances in clonal propagation
- + Current methods in micropropagation and tissue culture applications
- + Cell culture and production of secondary metabolites
- + Genetic evaluation protocols and tools
- + Marker assisted selection
- + Conservation and Evolutionary biology
- + Molecular physiology and Genomics
- + Genetic Engineering
- + Advanced DNA technologies and computation biology applications

Final Announcement

The final announcement will be available from 15, June 2013. Details of the scientific programs, registration form, travel, accommodation and proforma for extended abstract will be included.

Important Dates

Submission of Abstracts: 1, August 2013

Acceptance Notification: 15, August 2013

Submission of Extended Abstracts: 30, August 2013

Organizing Department

Division of Plant Biotechnology
