## *Purification of an anti-fungal lectin from leaves of *Withania somnifera* at IFGTB, Coimbatore*

Plant lectins have been investigated for their ability to confer resistance to insects, fungi, or nematodes. Low molecular weight, monomeric chitin-binding lectins with in vitro anti-fungal properties have been reported from very few plants. Institute of Forest Genetics and Tree Breeding (IFGTB), Coimbatore has purified a lectin from leaves of *Withania somnifera* (L.) Dunal (a potent medicinal plant) by gel filtration and affinity chromatography on concanavalin A sepharose. The purified fraction had a molecular mass of approximately 30 kDa and a pI value of 4.0. The protein was tested for its antifungal activity against *Trichosporium vesiculosum*, a tree pathogen. It inhibited the hyphal extension under *in vitro* condition. The changes in the cell wall morphology of the protein treated hypha were elucidated using SEM and it revealed a significant agglutination of the cell wall.

## *UNFCCC Meet at Bali - ICFRE participation*

Bali, Indonesia hosted the third meeting of the Parties to the Kyoto Protocol (COP/MOP 3), in conjunction with the thirteenth session of the Conference of the Parties to the United Nations Convention on Climate Change (COP 13), from 3<sup>rd</sup> to 14<sup>th</sup> December 2007. The ICFRE delegation, comprising Shri Jagdish Kishwan, DG, ICFRE; Shri Sandeep Tripathi, Secretary, ICFRE and Advisor, BCC Division, ICFRE; Dr. Renu Singh, Head Biodiversity and Climate Change Division and Dr. A. Ramchandran, Forest Utilisation Officer, Tamil Nadu, participated in the Conference (COP13/MOP3).

In Bali, the Indian Delegation achieved a breakthrough in putting forth India's concern of forest conservation as a mitigation measure on the centre stage of the REDD. India was putting forth the concept of 'Compensated Conservation' since Nairobi COP, through workshop in Cairns, and SBSTA meeting in Bonn. The Indian proposal on forest conservation/sustainable management of forests, and increment in forest cover as a policy approach to enhance carbon stocks found place not only in the preamble but also in the operative part (paras 3 and 7) of the COP decision on REDD. Similarly, COP decision on BAP contains reference, inter-alia, to policy approach and positive incentives
